sists of two parts. Part One includes information up to 1 October 1946 and contains the names of many plants which have been reported previously as belonging to the Soviet AG. Part Two is a supplement to Part One and adds more names, although it repeats some of the names in Part One. There is no date of information on Part Two, but the original list was copied on 11 December 1946.

In this report Parts One and Two are presented as separate units. Only previously unreported enterprises are given, except where better identification seems to warrant their inclusion.
